6 MM POLYCARBONATE SHEET

6mm thick twin-wall polycarbonate, manufactured with 100% virgin raw material. The Glanze polycarbonate sheet combines the properties of thermal insulation, high light transmission, and excellent impact resistance. It can be custom-cut and cold-curved. It is the perfect candidate for protecting your spaces from solar radiation and preventing material yellowing due to its co-extruded UV layer that acts against sunlight.

- Finishes: Blue, Bronze, Transparent, Green, White, Smoke, Yellow, Orange, Red, and Reflective Gray.
- Sales unit: 1 piece.

SKU: 1561025050 SOLID TAPE FOR POLYCARBONATE

Solid tape for polycarbonate (G3625), made from fleece (wool) with a plastic top layer on one side and coated with a durable high-performance acrylic adhesive on the other, providing the product with strong adhesion and good cohesive properties. This material is optimally suited for sealing the irregular contours of polycarbonate and is resistant to high and low temperatures as well as humidity. Line measurement: Width of 25mm by 50m length.

- Sales unit: 1 roll.
- Special Features: Used to SEAL THE UPPER EDGES of polycarbonate sheets (e.g., GLANZE sheets) against moisture and dust, thus maintaining the clarity of the sheets used in the construction of roofs, domes, canopies, etc.

- Special Features: Line
Measurement: Width of 25mm by 33m length.
- Attention: Used to SEAL THE BOTTOM EDGES of polycarbonate sheets (e.g., GLANZE sheets) against moisture and dust, thus maintaining the clarity of the sheets used in the construction of roofs, domes, awnings, etc. *In the installation of polycarbonate with a cannon arch profile (Key 2136 Herralum), it is recommended to use window-type tape at both ends. *Adhesive layer coated with Mylar 36 microns.

XILITLA MAGNETIC SLIDING DOOR SYSTEM

Linear magnetic sliding door system, with two smooth closing terminations that provide greater benefits to the sliding operation. This allows the door to be closed and smoothly slide along the rail to the final position. Its self-braking function prevents fingers from getting caught or the door from being slammed when closed. In addition, it reduces noise with its innovative design without dampers, allowing you to manually move the glass panel when the door is not connected to the power source.
